

ALBI BERBERI

Software Engineer | Tech Support

+43 660 1736943 | albiberberi456@yahoo.com | LinkedIn | Portfolio | Hagenberg 4232, Austria

EXPERIENCE

Web Developer

Freelance

2025 - Present | Remote | Hagenberg, Austria

Developed full-stack applications for customers

- Built multiple responsive full-stack web applications, including the Detroit Throne, AI Photostudio, ID Studio Architects, Notea, and a personal portfolio.
- Demonstrating skills in modern web development and UI/UX implementation, using React, Vue, Bootstrap, TailwindCSS, Vanta.js.

Intern Network Engineer

Communication Progress

05/2024 - 07/2024 | Tirana, Albania

One of Albania's most established ICT companies, with over 25 years of experience

- Analyzed network performance metrics to detect bottlenecks and support optimization of bandwidth
- Diagnosed and troubleshot connectivity and network performance issues
- Managed assigned networking tasks within strict project deadlines
- Supported the implementation and maintenance of network systems, assisting in deploying hardware and configuring basic network services

Software Developer

GALIVEXLABS

07/2023 - 04/2024 | Remote | Florida, USA

Startup tech company based in Florida USA

- Collaborated to the development of an anatomy based, AR-mobile application for medical students.
- Created a functional prototype in Unity (C#) that enabled interactive exploration of a 3D heart model.
- Implemented core features including main menu navigation and real-time user interaction with anatomical structures during the project's prototyping phase.

Security Operator

Active Watch Security

01/2022 - 10/2022 | Pogradec, Albania

Multinational video monitoring company

- Worked with software programs such as IVMS 5200, IVMS 4200, and XProtect.
- Established connection of programs to cameras, enabling observation and monitoring of workflow, thus ensuring high standards of safety and security.

PROJECTS

ID Studio Architects

02/2026 - Present | Brussels, Belgium

Developing a new responsive website for ID Studio Architects

- Focusing on modern UI/UX design, clear project presentation, and optimized performance.
- Aim to improve the firm's online presence, enhance client engagement, and provide a scalable platform for showcasing architectural projects and services.

EDUCATION

Masters in Interactive Media

FH Oberösterreich

2025 - Present

Bachelor in Software Engineering

Canadian Institute of Technology - CIT

10/2021 - 07/2024

SKILLS

PROJECTS

AI Photostudio

📅 10/2025 - 02/2026 📍 Hagenberg, Austria

AI Photo Studio is a web-based application developed as a semester project at FH Upper Austria

- Used AI to transform, edit, and enhance digital photographs through text prompts and voice commands.
- Built with React, TypeScript, Vite, and Tailwind CSS, the platform provides an intuitive interface for uploading reference images and generating AI-assisted visual edits through an integrated creative workflow.

The Detroit Throne

📅 2024 - Present 📍 Remote | Detroit, United States

Detroit Throne is an ongoing web development project for a Detroit-based streetwear brand.

- The website is being built using Bootstrap to deliver a responsive, mobile-first design, with structured layouts for product showcases, brand storytelling, and user-friendly navigation.
- The project aims to strengthen the brand's digital identity, improve accessibility across devices, and provide a scalable foundation for future features such as e-commerce integration and product catalog expansion.

Notea

📅 10/2025 - 01/2026 📍 Hagenberg, Austria

Notea is a responsive note-taking web application

- Developed with React and TypeScript that allows users to create, organize, and manage notes using a tag-based system.
- The application supports Markdown formatting, image uploads, filtering by title and tags, and local storage persistence, providing a structured and efficient note management experience.

GalivexLabs BioPrint Interactive Anatomy

📅 07/2023 - 04/2024 📍 Remote | Jacksonville, United States

BioPrint Interactive Anatomy, an AR-based mobile application for medical education

- Along with a team of four developers, contributed in designing and prototyping BioPrint, aimed at enhancing medical education through immersive 3D visualization.
- Developed a functional prototype in Unity (C#) that allowed users to interactively explore a detailed 3D heart model using augmented reality technology.
- Implemented key interface and interaction features, including a main menu navigation system and real-time manipulation of anatomical structures, supporting early-stage testing of the application's educational concept.

Enhancing Web Application Security through Grey Box Testing: A Comprehensive Evaluation and Implementation

📅 06/2024 📍 Tirana, Albania

BSc diploma thesis on web application security

- Evaluated web application security by implementing grey box testing techniques on OWASP WebGoat.
- Conducted vulnerability analysis and simulated attack scenarios to assess application security weaknesses.
- Documented findings and proposed mitigation strategies to improve web application security practices.
